Leadership & Management

PROFESSIONAL SUMMARY

I am a Frontend Developer and Network Engineer proficient in developing Single Page Applications with React. I am a problem solver, a strong team player, a quick learner and an adaptable person. I deliver reliable results with excellent project management skills. I am eager to contribute in any capacity to a great team, to do great work.

EXPERIENCE

Rick and Morty - Web Development

This project is an infinite scroll SPA that shows Rick and Morty's characters from an open-source RESTful and GraphQL API. The state of the application is managed with Redux and routed with the library React Router and styled with Sass.

Petgram - Web Development

Petgram is a Lazy load render SPA styled with library Styled-Components. It requests data with Apollo GraphQL. The data is persisted with Session Storage and shared through components with React Context. The SEO is optimized with React Helmet.

CriptoTracker - Mobile Development

CriptoTracker is a mobile application developed with React Native for IOS and Android operating systems. This app tracks the price of cryptocurrencies in the market allowing the user to match the value between them. The data is requested through an API Rest and routed with React-Navigation.

Android Mobile Developer

Colombia Movil S.A | Jun 2015 - Feb 2016

(Colombia's third largest mobile company)

Designed, developed, and tested a mobile application that tracks the progress of users' project management and goal fulfilment. Developed in Java and Eclipse IDE
